PROFESSIONAL SUMMARY

Data & Analytics Consultant specializing in global e-commerce and digital acceleration. Proven track record of delivering end-to-end data solutions for multinational brands, managing complex data pipelines, and designing executive KPI dashboards. Combines technical depth in SQL, BigQuery, and predictive modeling with a strong finance background to translate massive digital commerce datasets into high-impact, commercially grounded business narratives. Experienced in high-stakes, SLA-driven client environments.

PROFESSIONAL EXPERIENCE

AMARIS CONSULTING | Data & Analytics Consultant

Tokyo, Japan | Feb 2026 – Present

- Own end-to-end analytics delivery for Shiseido's Global Digital division, managing data pipelines and ensuring data reliability across global e-commerce and digital marketing touchpoints within strict SLA standards.
- Execute complex SQL queries in BigQuery to interrogate massive datasets, validating data integrity across omnichannel retail streams and surfacing actionable insights for global brand strategies.
- Design and maintain executive-facing KPI dashboards in Looker Studio, translating complex e-commerce, digital performance, and consumer journey metrics into clear, client-ready narratives.
- Monitor data health across global ingestion pipelines, proactively identifying failures in digital data streams and coordinating with international data owners to ensure operational continuity.
- Maintain rigorous data quality standards and pipeline documentation to support unified, cross-regional digital commerce reporting.
- Manage agile project workflows and cross-functional digital priorities using Jira and Confluence.

MENTERU INC. | Data Scientist

Tokyo, Japan | Oct 2024 – Feb 2026

- Architected modular data pipelines in Python to process large-scale time-series sensor data using GCP (Dataflow, Pub/Sub, Cloud Storage).
- Performed data extraction and transformation from Cloud SQL and BigQuery, creating model-ready datasets through feature engineering and normalization.
- Developed and optimized XGBoost models in Vertex AI for HVAC performance simulation, focusing on energy efficiency and thermal comfort.
- Automated real-time device actuation via REST API integrations with building systems using serverless Cloud Functions.
- Built interactive dashboards in Looker Studio and Streamlit to visualize model predictions, key performance metrics, and system behaviors for business stakeholders.

ACCOUNTING & FINANCE ROLES

- Conducted financial analysis, budgeting, and reporting across healthcare and public sector organizations in Australia and Nepal.
- Reconciled large volumes of transactional data to identify trends, anomalies, and process improvements.
- Managed aged debt forecasting and credit evaluation across multi-client environments.

Organizations:

Life Healthcare | Accounts Receivable Team Lead Sydney, Australia

Allergan Aesthetics | Accounts Receivable Coordinator Sydney, Australia

Mastercare Australasia | National Credit Manager Sydney, Australia

Bajra Technologies | Account Manager Kathmandu, Nepal

EDUCATION

Le Wagon Tokyo | Data Science and AI Bootcamp (2024)

Macquarie University | Master in Accounting (CPA Extension), Sydney, Australia (2018)

Christ University | Bachelor of Business Management (Marketing), Bangalore, India (2014)

SKILLS

Languages & Tools: Python (Pandas, NumPy, Scikit-learn), SQL, Jupyter, Git, REST APIs.

Cloud & Data Infrastructure: Google Cloud Platform (BigQuery, Cloud Functions, Pub/Sub, Dataflow, Vertex AI), Snowflake.

Data Engineering: Pipeline management, data health monitoring, feature engineering, normalization, RAG (Retrieval-Augmented Generation).

Machine Learning: XGBoost, Random Forest, KNN, time-series forecasting, and Model evaluation (RMSE, R-square).

Visualization & Reporting: Looker Studio (Google Data Studio), Streamlit, Plotly, Power BI

TECHNICAL PROJECTS

Resume Chatbot (AI & Full Stack Application)

<https://karushp.github.io/resume-chatbot> | <https://github.com/karushp/resume-chatbot>

AI-driven agentic system to automate information retrieval chatbot using RAG to answer questions about professional experience.

Tools: Python, Flask, FAISS, Cohere API, Groq API.

Expense Tracking & Receipt Management System

<https://github.com/karushp/organize-receipt>

Automated receipt processing and financial reporting tool featuring cloud storage and multi-platform data synchronization.

Tools: Python, Streamlit, Supabase, Google Sheets API, OpenCV, ReportLab.

EMS Energy Consumption Dashboard

<https://github.com/karushp/ems-dashboard>

Created an interactive Streamlit dashboard for analyzing energy consumption across Japan.

Tools: Python, Streamlit, Pandas, Plotly, Parquet.

Safety Helmet Detection (Computer Vision)

Developed a real-time ML model identifying instances of safety helmet usage.

Tools: YOLO, OpenCV, Python.

ADDITIONAL INFORMATION

Languages: English (Fluent), Nepali (Native), Hindi (Fluent).

Certification: Japanese Driver's License (普通自動車免許).
